THE HOME OFFICE COLLECTION

The Home Office is increasingly a consideration by furniture consumers as the rate of home working continues to grow. More and more people are defining areas in their homes as working areas and the need to hide away the clutter that can be created is fundamental, both from a desirable and practical point of view.

Security is also an issue "out of sight-out of mind" as well as being able to keep expensive and, in some cases, vital equipment out of the reach of young and inquisitive fingers. With this in mind Wood Bros have developed a range within OLD CHARM to meet the needs of this niche but expanding market.

Home Office is a collection that offers functionality and style that can be used in a stand-alone situation but also offers breadth to enable appropriate modern day solutions but in a traditional old English style. It has been designed with the latest technology in mind but not at the expense of being able to accommodate more established systems. Cable management and air ventilation have been well considered and provided for, as well as the storage of all the elements that make up a modern day system.
